

The FCC should not change rules on broadcast ownership in a way that allows further consolidation!!!!

I am extremely concerned by the changes under consideration to rules concerning limits on broadcast ownership. I think the proposed changes will limit the availability of diversity of views and opinions to the public. The radio spectrum is a public resource that the broadcast industry is allowed to use. Allowing further consolidation is not in the public interest, and I strongly oppose it. The FCC should not sacrifice the public interest to the interests of industry! If broadcast ownership rules are changed to allow further consolidation, the FCC will be flouting its responsibility to the American people.
